

WAITING LIST AND CRITERIA

Waiting list

In order to be placed on the waiting list, persons in need of rehabilitation can fill out the 'Insertion Request Form' going to the secretariat of the 'Associazione Scuola Viva'. The form can also be filled in by telephone or online through www.scuolaviva.org.

Requests for inclusion are registered on the waiting list in chronological order and can only be confirmed upon presentation of a suitable specialist prescription or multidimensional assessment by the ASL, according to the specific services.

The waiting list is splitted by the following types:

Semi-Residential

Non Residential:

- Outpatient Developmental Age
- Motor, Neuromotor and Vascular Outpatient Rehabilitation
- Motor and Neuromotor Home Rehabilitation

Evaluation and Priority Criteria

Requests for treatment are assessed by the Doctor, the Coordinator and the Social Worker of Scuola Viva, according to the listed order and the specialist prescription or the multidimensional assessment by the ASL. Other items have to be taken into consideration, such as the severity of illness, the urgency of the treatment itself and compliance with the clinical access criteria defined by the Regional regulations.

The evaluation of a new user will begin when there are vacancies or when a user is expected to be discharged and/or if the rehabilitation project is stopped without warning.

After the first medical test, once eligible for inclusion, the waiting time before starting the rehabilitation project, will be notified within 15 days.

CHARGES PAYABLE BY THE USER

For both the Semi-Residential Dept extensive rehabilitation projects mode and the Non-Residential Outpatient and Home Care Sector, the entire charge is borne by the National Health Service.

For the socio-rehabilitation (maintenance) projects mode in the Semi-Residential Dept, the user charges are set at 30% of the fee, according to the Region Lazio Resolution income brackets no. 790 of 20/12/2016 ex D.G.R. no. 380 of 07/08/2010.

WHERE ARE WE

Serving person with disabilities since 1975

Scuola Viva is a Rehabilitation Centre for PwD (former Article 26 of Law 833/78), located in Rome, authorised and accredited with Lazio Regional Health Service by Decree C.A. no. U00026 of February 10th 2014.

QUALITY MANAGEMENT SYSTEM

The Centre is certified ISO 9001 and it is constantly striving for continuous improvement and testing the quality of its services.

MANAGEMENT

Legal Representative	Serenella Pocek
General Manager	Elisabetta Martello
Medical Director	Dr. Fabrizio Fea, neurologist and forensic doctor

OPENING HOURS

The Centre works daily except on holidays, as follows:

The Centre:

Monday to Friday from 08.20 a.m. to 07.30 p.m.
Saturday from 08.30 a.m. to 12.30 p.m.

The Secretariat:

Monday to Friday from 08.30 a.m. to 04.30 p.m.

REHABILITATION TREATMENTS TYPES

The person is taken in charge by the multidisciplinary team, consisting of: doctors, psychologists, rehabilitation professionals and the social worker.

SEMI-RESIDENTIAL

The Semi-residential Dept is addressed to **young adults with intellectual and developmental disabilities**, due to, for example, genetic diseases and/or trauma and/or related to pervasive developmental disorders.

The Semi-residential Dept is specialised in educational rehabilitation projects based on group or individual activities, enabling users, with different learning abilities to relate, understand and improve their personal autonomy and self-esteem, to prevent worsening and in order to foster social participation.

The Semi-residential service is provided by the Centre in Via Crespina 35, through rehabilitation-education treatment for 36 (thirty-six) hours weekly spread over five days. Transport of users to and from the Centre is organised by the Local Health Authority or by the users' family members.

NON RESIDENTIAL

OUTPATIENT REHABILITATION SERVICE FOR CHILDHOOD AGE

This service is aimed to users with disorders in the area of neuro-development. Particularly, as follows: **communication disorders** (speech, social-pragmatic communication), **movement disorders** (motor coordination), **specific learning disorder**, **intellectual disabilities and mixed developmental disorder**, **autism spectrum disorders**, **hearing loss**, **P.C.I. outcomes**, **attention-deficit/hyperactivity disorder**, **neuromotor disorders**.

According to specific needs, the project is given by speech therapy, neuro-psychomotricity, physiotherapy, educational interventions and Interventions with Animal.

NON RESIDENTIAL

MOTOR, NEUROMOTOR AND VASCULAR REHABILITATION SERVICES

These services are provided to persons with disabilities due to complex diseases affecting the osteo-articular, the neuro-muscular and the lymphatic systems.

Neurological rehabilitation service is aimed to people with a loss of autonomy due to congenital or acquired diseases of the central and/or peripheral nervous system. For example: **Parkinson's disease and Parkinsonism**, **ataxias**, **multiple sclerosis**, **ALS**, **dystrophies**, **tetraplegia paraplegia**, **haemiplegia**, **monoplegia from ischaemic or haemorrhagic stroke outcomes**, **post-cancer or post-surgical disabilities**.

The **orthopaedic rehabilitation** service is aimed to people with disabilities following a major acute or chronic impairment of the musculo-skeletal system and post-surgical conditions. For example: **joint replacement outcomes** (hip, knee, shoulder), **limb amputations**, **osteo-articular polytrauma**, **tendon and muscle injuries**, **rheumatoid arthritis**.

Vascular rehabilitation service is aimed to people with disorders of the vascular, lymphatic or venous system, such as: **post-mastectomy lymphoedema** and **other lymphedemas**.

Outpatient rehabilitation treatment

Rehabilitation treatment is carried out in the Centre's facilities, within the gyms equipped with special instruments.

Home rehabilitation treatment

Home treatments are provided to support special needs, such as:

- user unable to reach the outpatient services due to severe disabilities,
- carry out a readaptation programme within the home environment and in daily activities.
